I'm having a call at 2:30 (in 15 mins) with Rich Rupert to discuss the sampling plan. You are welcome to join us. Sorry for the delayed notice.

Would you send a response to Suddha on this? I can't open the attachment right now so not sure if the parameter list agrees with what we sent last week. What we can't do I will forward to other regional labs. I think R8 is interested in helping but I'll need to check on that next week - everyone's out. At a minimum we can tell Suddha we will confirm on Tuesday and that an ARF is needed before a DAS # is assigned.

Ms. Caporale and Ms. Warner,

I was requested by OSC Rich Rupert to let you know which parameters EPA was sampling for the Dimock Residential Well Site and additionally what parameters we thought Ft. Meade was to analyze for. Please find the attached spreadsheet. Column A of Table 1 lists which lab the parameter will be analyzed at.

We were requested to add DRO and GRO analysis (Method 8015M) to our list. Are you able to analyze for these parameters?

Also, do you have a DAS Case Number assigned for this project?

Please let me know if you have any questions.

Thanks,

Suddha Graves
